PH7208

SH10

PH7208 Extra siren for Security System

You can connect one or more extra Sirens to the Security System. With an Alarm Interface (SM10) you can connect these Sirens also to other Security Systems.

WARNING:

1. The Siren works on 230V. Do not open the housing – high voltage inside. Make sure you unplug the PH7208 from the mains before installing.
2. The Siren produces an extreme loud sound (110dB). To prevent ear damage you should never be near an active Siren.

How your PH7208 siren works:

The siren works without extra wiring. The commands to switch the siren on and off are sent through the existing house wiring (X10 command "all lights on" and "all lights off"). These commands are being placed on the existing house wiring by Alarm Systems or by an Interface SM10.

Note: the Siren has to be connected on the same phase as the alarm console.

To prevent false alarm the system waits a few seconds before triggering the Siren after activating the Alarm. The Siren makes a piercing two-tone signal for 4 minutes when activated. After this the Siren will be automatically switched off (or sooner when the alarm is switched off).

Note: When you use an Alarm System, the Sirens always work during an alarm, regardless of the function silent alarm is being switched on. To activate the Siren the Unit Code and House Code on the Alarm console or the Interface needs to be set up the same as the Siren. The standard Code is A1.

Mounting PH7208

The Siren PH7208 is made for inside use. The PH7208 can be connected to any power point.

DECLARATION OF CONFORMITY

Hereby, X10 Europe, declares that the PH7208 / SH10 is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC.

Hiermit erklärt X10 Europe die Übereinstimmung des Gerätes PH7208 / SH10 den grundlegenden Anforderungen und den anderen relevanten Festlegungen der Richtlinie 1999/5/EG.

Bij deze verklaart X10 Europe, dat deze PH7208 / SH10 voldoet aan de essentiële eisen en aan de overige relevante bepalingen van Richtlijn 1999/5/EC.

Par la présente X10 Europe déclare que l'appareil PH7208 / SH10 est conforme aux exigences essentielles et aux autres dispositions pertinentes de la directive 1999/5/CE
